List of improvements

Montag, 22. Juni 2015   22:34

- [x] add detailed information if there is a problem fetching the book data
- [x] add a progress indication when the book request is running
- [x] check that the ISBN field remains untouched until there is a positive result (book added)
- [x] add hint texts to the edit text fields (search)
- [x] fix the booklist after a deletion (the list doesn't update correctly)
- [x] look at the book details: while loading data the content and the title seem to fight with each other
- [x] Fix the about screen (at least add some margin)
- [x] Add barcode scanning library
- [x] Remove manual JSON handling and replace it with Retrofit
- [x] Check behavior while having no internet connection (taken from the user complaints)
- [x] Search for untranslated strings (Lint?)
- [x] Add description strings to all images and buttons
- [x] Replace custom implementation of async image download with Glide
- [x] Restructure phone layout to have a result container that can be set to visible/invisible instead of each item
- [x] Restructure the tablet layout to do the same as the phone layout.
- [x] Deactivate edit text and scan button while the result is displayed
- [x] Filter EditText input to only allow valid characters
